DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 15-18, drawn to to memory cell comprising MOSFET, classified in class 257, subclass 298.
- II. Claims 6-8 and 19-21, drawn to memory cell having selct and access lines, classified in class 365, subclass 72.
- III. Claims 9-14, drawn to a method of operating a memory cell, classified in class 365, subclass 189.09.
- IV. Claims 22-28 and 29-31, drawn to a memory cell comprising a conductive structure , classified in class 365, subclass 104.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). **In the instant case the different inventions I, II and IV have different functions, and different effects. Also, invention III has different mode of operation.**

Art Unit: 2824

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
